

# Chisanbop Workshop - Korean Finger Math

## A kinesthetic approach for learning basic number facts

A method for teaching primary grades and older students who have difficulty memorizing basic number facts

### What do I learn in the Chisanbop Workshop?

In this 4½ hour course you can learn how to add, subtract, multiply and divide using your fingers. Effortlessly, you'll learn these Chisanbop fundamentals:

**Part 1** - By the end of this session you will know how:

- § To count to 99 on your two hands
- § To add and subtract basic facts to 18
- § To add and subtract large numbers

**Part 2** - By the end of this session you will know how:

- § To use short cuts to do calculations faster
- § To do the multiplication tables using your two hands
- § To multiply large numbers by one digit
- § To use multiplication to do division

### Benefits of Using Chisanbop

- Allows for easier learning of math facts
- Kinesthetic approach for those who need it
- Assists those who difficulty with memorizing number facts
- Builds confidence in one's ability to do math
- Improves understanding of place value
- Develops more positive outlook towards math

### Your Instructor

Maurine Maslen, Bed, BA, MEd, is the owner of the Centre for Positive Learning in St. Albert. She has worked extensively in Special Education when she taught in Calgary, Edmonton and Grimshaw. To learn how to assist her students to overcome learning problems, she continually researched and learned ways to get around their difficulties. Since many of her students were kinesthetic learners, Maurine became very interested in Chisanbop Korean Finger Math. She has effectively used this method with many of her students and clients.

## Workshop Details

**Dates:** Summer Friday, July 6, 2007, or Friday, August 3, 2007
